

## IBM i Solution Editions for Infor

- **IBM and Infor understanding of your goals**

Infor and IBM Solutions will allow you to:

- Increase market share
- Enhance competitive advantage
- Ideal positioning for profitability

- **IBM and Infor approach to meeting your goals**

- Making the supply chain lean
- Optimizing asset management and energy management
- Improving planning cycles
- Leveraging customer relationships

- **Features:**

- Infor ERP and IBM i running on the latest IBM Power Systems platform provides world-class performance, dynamic infrastructure flexibility and the opportunity to lower operations costs
- IBM i provides Infor ERP customers with efficient business processing, virtualization and scalability
- IBM Power Systems servers offer a highly integrated, scalable, reliable and virus-resistant platform, and, unlike x86-based alternatives, allow you to focus on your business rather than your software and server

- **Benefits:**

- IBM Power Systems are designed and optimized for simpler implementation to help you get your Infor applications up and running faster
- Infor applications running on IBM Power Systems offer substantially lower Total Cost of Ownership as compared with x86 servers

- **Why IBM?**

- IBM and Infor have over 30 years of expertise working together in developing end-to-end solutions
- The IBM Power platform with i is designed to free businesses from IT complexity and improve responsiveness of both systems and people.
